MAKE + WONDER + PRACTISE

Pop your Reframers on!

Make a pair of glasses. Try a different view.

For children aged 7-12
and a grown-up to try together.

Gather a few simple supplies

Paper or light card, colouring materials, stickers or paper shapes, glue or tape, and scissors with grown-up help.

1. Create Decorate the frame on page 2. Keep the centre openings clear if using it as a prop.

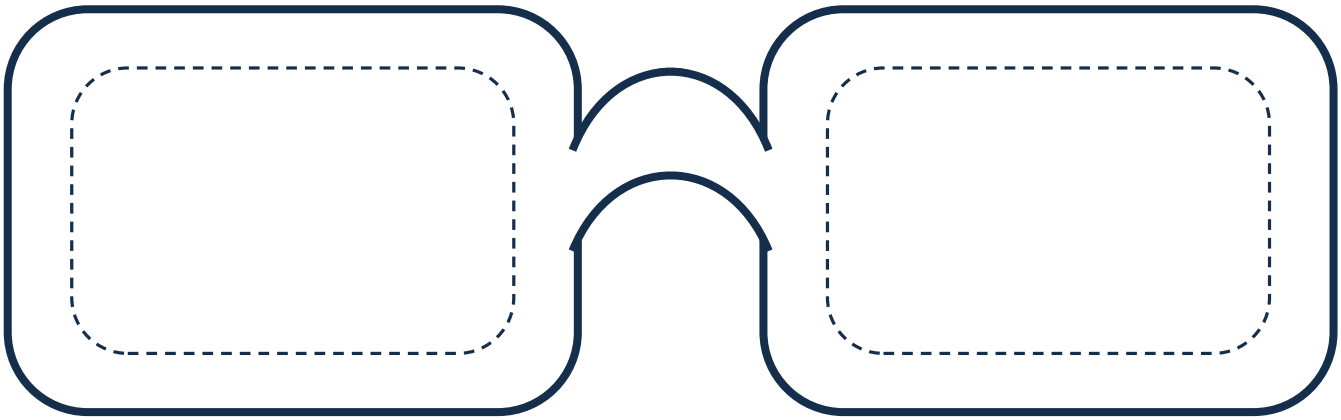

2. Discover Use the glasses sheet on page 3 to explore a small everyday moment.

3. Repeat Try one short conversation each day using page 4.

CREATE

Make your own Reframers

Decorate the frame. A grown-up can help cut out the shape and eye openings.

Decorate the frame around the dotted openings.

My glasses remind me to ask:

What else could be true?

Make it a handheld prop

Tape a folded strip of card to one outer edge as a handle. Hold the frame in front of your face or place it beside your worksheet. Ask a grown-up to help with cutting.

DISCOVER

My first thought. Another view.

Choose a small moment. Draw, write or ask a grown-up to write your words.

What happened?

My first thought

Another way to see it

Look again: What do I know? What am I guessing? What else could be true?

A feeling I notice

One helpful next step / someone who can help

REPEAT

Five little chances to look again

Pick a calm moment. A new thought does not have to change your feeling straight away.

DAY 1

Notice

What thought popped up today?

DAY 2

Get curious

What did you know? What were you guessing?

DAY 3

Look wider

What else could have been going on?

DAY 4

Speak kindly

What would you say to a friend here?

DAY 5

Choose a step

What could you try, ask or practise?

Keep the curiosity going.

In a Reframers workshop, children create handmade glasses and practise looking at everyday situations from different perspectives.
